During the \$247X Token Sale rounds (Seed, Private Sale and Public Presale) we aim to raise €7,500,000. These rounds will run till the available tokens have been sold out.

Raised funds will be used to develop and roll out this unique tokenized entertainment ecosystem, restructure our incorporation and to prepare the \$247XE STO proposal to get approval from the financial regulators.

Click [here](#) to get a detail overview from the \$247X Tokenomics.

\$247X tokens are deflationary tokens which means that the total supply decreases with every sell or buy transaction (0.1% burn).

This method will affect the price of \$247X tokens to go up and increase the value of tokens for all token holders.

The \$247XE Token Sale (Private Sale) starts once the financial regulators (FMA Liechtenstein) have approved the STO Proposal (scheduled Q3/2026).

Both \$247X and \$247XE tokens will be distributed to the participants crypto wallets 4 months after completing the ICO and STO (listing on Tier 1 Crypto Exchanges (Public Sale) according a pre-scheduled vesting mechanism.

Each of our founding team members has experience in various management roles within the online entertainment, blockchain, digital marketing and ecommerce space. Collectively they will bring a lot of knowledge on the table to realize and put the 247x Tokenized Ecosystem on the Worldmap.

From Q2/2025 we will start the recruit and hire process to onboard professionals, advisors to expand our team. We expect to have +/- 30 full-time employees and contractors working to realize and roll out the 24X7 Ecosystem by 2026.
